(’77)

*Interviewed on 05/19/2021 as told to Coltin*

*Received Most Wired Hospital, 2013*

*Me and my wife, Yasmin, now retired*

“

I chose UH because of the Natural Science and Mathematics Programs.

”

STUDENT LIFE, RICH TRADITIONS & GREEK LIFE

**I** chose UH because of the Natural Science and Mathematics Programs. The first computer course helped me out to change my plan. I was able to finish my courses in computer science and got a job, which was excellent. I have worked with the industry for almost 42 years now. I was related to healthcare. I received knowledge from the University of Houston; whatever I learned helped me in my goal to achieve a nice lifestyle. I enjoyed my first computer science course, and I decided that this was the right way to do it because I enjoyed it. I liked to work on it. I think the students should pay attention to what they really like.
